Engineered High Performance Surfaces & Flooring

INDUSTRIAL FLOORING SOLUTIONS

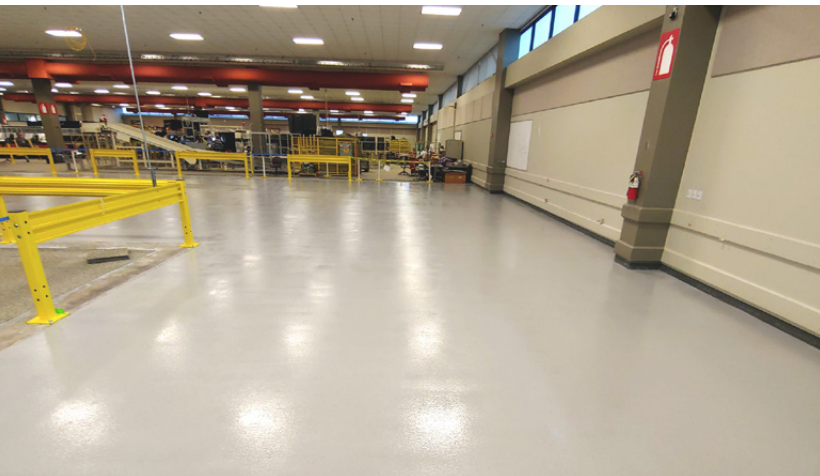

Resinous and cementitious coatings for
commercial and industrial concrete surfaces

CSI Divisions 03 & 09

INDUSTRIAL FLOORING SOLUTIONS

elite crete systems
Engineered High Performance Surfaces & Flooring

ULTRA DURABLE
EASY TO MAINTAIN

QUICK INSTALL
SHORT DOWNTIME

Engineered flooring solutions combine tested technologies with industry-driven innovation and are designed for industrial, manufacturing and warehouse facilities.

- ✓ WAREHOUSES
- ✓ MANUFACTURING PLANTS
- ✓ ASSEMBLY LINES
- ✓ AUTOMOTIVE SERVICE AREAS
- ✓ AEROSPACE FACILITIES

SPECIALTY FLOOR COATINGS ENGINEERED FOR EXTREME ABRASION AND CHEMICAL RESISTANCE

These protective coatings offer extreme durability to withstand heavy traffic, including fork lifts and other industrial machinery. Additionally, the ability of these systems to withstand petro-chemicals surpasses that of traditional industrial surfaces.

ULTRA DURABLE, LONG LASTING

Seamless flooring systems are fluid-applied in place and the installation process has a quick turn around time. This results in less downtime, including during patch-and-repair maintenance. Vertical applications available, including cove base for containment purposes.
